*The single-source solution for  
PTAC unit installation!*

The PTAC Base System is a complete unit not just a louver. Our system comes complete, requiring no on-site fabrication or assembly. It can be installed in minutes by two workers. Direct, on-time shipment is provided in wooden crates. Our large window sill member provides window load support and an attractive window sill.

Optional architectural louver covers provide a distinctive finish and extra protection for the louver set. Louver materials and construction are approved by major PTAC manufacturers.

Easy installation is accomplished with nail fins. A receptor installation system is also available. Installation framing requires only a door-type rough opening. Our system does not require a separate rough opening for the PTAC sleeve.

The Benchmark PTAC System eliminates leak potential. A full width 3/4-inch high subsill is provided to bring moisture in the system, from condensate or any other source, back to the exterior.

All finish options are available with custom finish and grill ornamentation.

Place PTAC Base System into rough opening.

## Step 1

Screw in place.

## Step 2

Caulk stacking mull.

## Step 3

Place window in opening.

## Step 4

Ready to install PTAC sleeve.

# PTAC

*Base System-  
The finest PTAC installation unit*

After completing four basic steps, the unit is ready for PTAC sleeve installation.

The PTAC Base System is designed and constructed for flexibility. Our system accommodates all PTAC manufacturers.

Benchmark Fabricating has been in the construction business for more than 40 years and understands the needs of contractors and builders. We've manufactured windows systems for more than 12 years.

We offer a proven product that helps save time and money through easy installation and on-time delivery.

Call or see an authorized dealer for order information.
